COURSE CODE	CHM 191
COURSE DESCRIPTION	PRACTICAL LABORATORY CHEMISTRY 1
TITLE	FREQUENTLY ASKED QUESTIONS
COMPILED BY	JOLAYEMI DAVID.

1. What is the boiling point of water at sea level?

a) 100°C

b) 0°C

c) 50°C

d) 200°C

2. Which piece of laboratory equipment is used to measure precise volumes of liquid?

a) Bunsen burner

b) Beaker

c) Graduated cylinder

d) Test tube

3. What is the chemical symbol for gold?

a) Ag

b) Au

c) Hg

d) Pt

4. Which type of reaction involves the transfer of electrons from one substance to another?

a) Acid-base reaction

b) Redox reaction

c) Precipitation reaction

d) Combustion reaction

5. What is the pH of a neutral solution?

a) 7

b) 14

c) 0

d) 10

6. Which gas is produced during the electrolysis of water?

a) Oxygen

b) Hydrogen

c) Carbon dioxide

d) Nitrogen

7. What is the chemical formula for table salt?

a) NaCl

b) HCl

c) KCl

d) CaCl2

8. What is the process of separating a mixture based on differences in boiling points called?

a) Filtration

b) Distillation

c) Chromatography

d) Evaporation

9. Which element is the most abundant in Earth's atmosphere?

a) Oxygen

b) Nitrogen

c) Carbon

d) Hydrogen

10. What is the SI unit for measuring temperature?

a) Kelvin (K)

b) Celsius (°C)

c) Fahrenheit (°F)

d) Rankine (°R)

11. Which type of glassware is used to hold and heat small amounts of liquid?

a) Beaker

b) Erlenmeyer flask

c) Test tube

d) Graduated cylinder

12. What is the process of a solid changing directly into a gas called?

a) Sublimation

b) Vaporization

c) Condensation

d) Deposition

13. Which type of bond involves the sharing of electrons between atoms?

a) Ionic bond

b) Covalent bond

c) Metallic bond

d) Hydrogen bond

14. What is the chemical symbol for iron?

a) Fe

b) Ir

c) In

d) Ie

15. Which gas is responsible for the "pop" sound when a burning splint is placed into a test tube of gas?

a) Oxygen

b) Hydrogen

c) Nitrogen

d) Carbon dioxide

16. What is the process of a gas changing into a liquid called?

a) Sublimation

b) Vaporization

c) Condensation

d) Deposition

17. Which type of reaction involves the combination of two or more substances to form a single product?

a) Decomposition reaction

b) Synthesis reaction

c) Single replacement reaction

d) Double replacement reaction

18. What is the chemical formula for water?

a) H2O2

b) HOH

c) H2O

d) OH_2

19. Which piece of laboratory equipment is used to measure mass with high precision?

a) Bunsen burner

b) Beaker

c) Balance scale

d) Test tube

20. What is the process of separating a mixture based on differences in solubility called?

a) Filtration

b) Distillation

c) Chromatography

d) Evaporation

21. What is the chemical formula for carbon dioxide?

a) CO_2

b) CO_3

c) C_2O_4

d) C_2O_3

22. Which type of glassware is used to measure and transfer small volumes of liquid?

a) Beaker

b) Erlenmeyer flask

c) Pipette

d) Graduated cylinder

23. What is the process of a liquid changing into a gas at the surface called?

a) Sublimation

b) Vaporization

c) Condensation

d) Deposition

24. Which type of bond involves the transfer of electrons from one atom to another?

a) Ionic bond

b) Covalent bond

c) Metallic bond

d) Hydrogen bond

25. What is the chemical symbol for sodium?

a) So

b) Sn

c) Na

d) No

26). What is the purpose of a Bunsen burner in a chemistry lab?

a) To heat substances

b) To mix chemicals

c) To measure volume

d) To test pH levels

27). Which piece of glassware is commonly used to measure precise volumes of liquid in a chemistry lab?

a) Beaker

b) Erlenmeyer flask

c) Graduated cylinder

d) Test tube

28). What is the function of a mortar and pestle in a chemistry lab?

a) To measure temperature

b) To grind substances into powders

c) To measure pH levels

d) To mix chemicals

29). What is the purpose of a fume hood in a chemistry lab?

a) To store chemicals

b) To dispose of waste

c) To provide ventilation for harmful fumes

d) To conduct experiments

30). Which safety equipment should be worn when working with chemicals in a chemistry lab?

a) Gloves and goggles

b) Lab coat and sandals

c) Apron and hat

d) Face mask and boots

31). What is the purpose of a wash bottle in a chemistry lab?

a) To store water

b) To dispense distilled water

c) To clean glassware

d) To measure volume

32). Which type of balance is used to measure small masses in a chemistry lab?

a) Triple beam balance

b) Digital balance

c) Analytical balance

d) Spring balance

33). What is the function of a hot plate in a chemistry lab?

a) To heat substances

b) To measure temperature

c) To mix chemicals

d) To store samples

34). Which piece of glassware is used to transfer small amounts of liquid in a chemistry lab?

a) Beaker

b) Erlenmeyer flask

c) Dropper pipette

d) Test tube

35). What is the purpose of a desiccator in a chemistry lab?

a) To store chemicals

b) To measure volume

c) To dry substances

d) To mix chemicals

36). Which type of glassware is used to contain and heat small amounts of liquid in a chemistry lab?

a) Beaker

b) Erlenmeyer flask

c) Test tube

d) Graduated cylinder

37). What is the function of a magnetic stirrer in a chemistry lab?

a) To heat substances

b) To mix chemicals

c) To measure volume

d) To test pH levels

38). Which type of glassware is used to hold and mix liquids in a chemistry lab?

a) Beaker

b) Erlenmeyer flask

c) Test tube

d) Graduated cylinder

39). What is the purpose of a pipette in a chemistry lab?

a) To measure temperature

b) To transfer small amounts of liquid

c) To clean glassware

d) To store chemicals

40). Which piece of glassware is commonly used to store and heat solutions in a chemistry lab?

a) Beaker

b) Erlenmeyer flask

c) Test tube

d) Graduated cylinder

41). What is the function of a Buchner funnel in a chemistry lab?

a) To filter solids from liquids

b) To measure temperature

c) To store chemicals

d) To mix chemicals

42). Which type of glassware is used to measure the volume of gases in a chemistry lab?

a) Beaker

b) Erlenmeyer flask

c) Gas syringe

d) Graduated cylinder

43). What is the purpose of an evaporating dish in a chemistry lab?

a) To measure temperature

b) To store chemicals

c) To heat and evaporate liquids

d) To mix chemicals

44). Which piece of glassware is commonly used to conduct reactions at specific temperatures in a chemistry lab?

a) Beaker

b) Erlenmeyer flask

c) Test tube rack

d) Heating mantle

45). What is the function of a separatory funnel in a chemistry lab?

a) To measure volume

b) To mix chemicals

c) To separate immiscible liquids or solids from liquids

d) To test pH levels

46). Which piece of glassware is commonly used to measure precise volumes of liquid in a chemistry lab?

a) Beaker

b) Erlenmeyer flask

c) Graduated cylinder

d) Test tube

47)Which of the following is a characteristic of metals?

A. Soluble in water.

B. Good conductors of heat and electricity.

C. Malleable.

D. Insoluble in water.

48) A student adds magnesium turnings to a crucible, and then heats it using a Bunsen burner. Which of the following substances is produced?

A. Hydrogen.

B. Magnesium oxide.

C. Magnesium chloride.

D. Magnesium nitride.

49). Which of the following is NOT a product of the electrolysis of molten lead bromide?

A. Lead.

B. Bromine.

C. Hydrogen.

D. Oxygen.

50). In aqueous solution, which of the following substances is amphoteric?

A. Sulfuric acid.

B. Sodium hydroxide.

C. Hydrogen chloride.

D. Aluminum hydroxide.

51). Which of the following is an endothermic process?

A. Sublimation of dry ice.

B. Burning of natural gas.

C. Vaporization of water.

D. Melting of ice.

52). Which of the following is a metal?

A. Argon.

B. Zinc.

C. Chlorine.

D. Silicon.

53). Which of the following processes requires a decrease in temperature?

A. Melting of ice.

B. Sublimation of dry ice.

C. Freezing of water.

D. Vaporization of water.

54). Which of the following substances is insoluble in water?

A. Sodium chloride.

B. Copper sulfate.

C. Ammonium chloride.

D. Calcium carbonate.

55). Which of the following has a pH of 7?

A. Hydrochloric acid.

B. Water.

C. Sulfuric acid.

D. Sodium hydroxide.

56). Which of the following substances is a weak acid?

A. Hydrochloric acid.

B. Citric acid.

C. Sulfuric acid.

D. Nitric acid.

57). Which of the following substances is a strong base?

A. Sodium bicarbonate.

B. Sodium hydroxide.

C. Ammonia.

D. Calcium hydroxide.

58). Which of the following is an example of a covalent bond?

A. Sodium chloride.

B. Sodium bicarbonate.

C. Hydrogen gas.

D. Magnesium oxide.

59). What is the purpose of a spectrophotometer in a chemistry lab?

a) To measure temperature

b) To mix chemicals

c) To analyze the concentration of substances in a solution

d) To store chemicals

60). Which of the following properties is characteristic of metals?

A. Low melting points.

B. Low electrical conductivity.

C. Hardness.

D. Low reactivity.

ANSWERS

1. A	11. C	21. A	31. C	41. A	51. A
2.C	12. A	22. C	32. C	42. C	52. B
3. B	13. B	23. B	33. A	43. C	53. C
4. B	14.A	24. A	34. C	44. D	54. D
5.A	15. B	25. C	35. C	45. C	55. B
6. B	16. C	26. A	36. C	46. C	56. B
7. A	17. B	27.C	37. B	47. B	57. B
8. B	18. C	28. B	38. A	48. B	58. C
9. B	19. C	29. C	39. B	49. D	59. C
10. A	20. C	30. A	40. B	50. D	60. C

WISHING YOU ALL SUCCESS IN YOUR EXAMS.
